

REDUCE: WATER, FILLERS, PACKAGING

The Doctor Drain® single flush formula reduces water usage by 50% versus multi-flush products such as Rid-X®. And, our concentrated formula eliminates unnecessary product “fillers” and reduces packaging.

Significant Reduction in Packaging Certified
by The ULS (Use Less Stuff) Report

RESPECT: THE ENVIRONMENT

Our strongest Doctor Drain® is not just better for your septic system, it's also safer for your environment. Doctor Drain® is 100% natural and works organically. Billions of specially selected bacteria and enzymes give Doctor Drain® its power to more effectively break down the organic waste flowing through your pipes and into your septic system. Plus, our new flexible pouch creates up to 75% less waste than our old package.

CONSERVE: RESOURCES

Because Doctor Drain® is concentrated and requires just one flush, it saves natural resources. And because it costs less than other brands, it saves financial resources as well!

Doctor Drain®: Simply the best way to eliminate odors, prevent backups, and keep your septic system or cesspool operating at maximum efficiency.

WE'VE CHANGED FOR THE BETTER!

A technological breakthrough has produced our strongest and most powerful Doctor Drain[®] ever. It's now even better for your septic system as well as for the environment.

Doctor Drain[®] is all natural, and has up to 10 times more bacteria than Rid-X[®] and costs less. Its single-flush, concentrated bacteria and enzyme formula also reduces material consumption and packaging waste.
